COMPACT AND VERSATILE: Its compact design, light weight, and low cost make the IBM Personal System/2 (TM) Model 30 ideal for customers requiring word processing, spreadsheet and business application solutions. The Model 30 can be used as an entry-level stand-alone system, as part of a network or be connected to a large host computer.

The new IBM Personal System/2 Model 30, shown attached to an IBM Personal System/2 Color Display Model 8513, is about 25 percent smaller than the IBM Personal Computer XT (TM) but can process information up to 2 1/2 times faster.
