World Wide Web in the West
The **Spring Internet World '95** is coming to the San Jose (Calif.) Convention Center April 10–13, promising to deliver everything you need to know about WWW, Mosaic, home pages, firewalls, and doing business on the net. After a day of tutorials, the conference begins Tuesday and is arranged in six tracks that emphasize technical, business, and social aspects of networking and the Internet. Thursday concludes with more tutorials.

Early registration (before 3/29) costs $495 for the full conference or $295 for one day. Tutorials incur an extra charge. To register, call 800.632.5537; fax 203.226.6976; or send e-mail to *iwconf@meckler-media.com*.

Unplugged Nets in the East
For those who prefer their networking wireless, there's **Network World Unplugged**, happening April 11–13 at the New York (City) Hilton. Billed as the "anywhere, anytime" computing conference and exposition, the show offers tutorials on mobile data and messaging, PCS, and remote LAN access. These are followed by two days of exhibits, plenary sessions, and a dual-track conference program covering application solutions and an integrators' forum.

The full conference-plus-tutorial package runs $995, $795 for just the conferences, or $445 for the tutorials alone. To register, call IDG World (Framingham, Mass.) at 800.225.4698; fax 508.872.8237, or send e-mail to *unplugged@idgwec.com*.

Embedded Systems in the South
The annual **Embedded Systems Conference East** will be held at the Inforum in Atlanta (Ga.) on April 18–20. Nick Tredennick, *Microprocessor Report* contributor and author of *Microprocessor Logic Design*, will deliver the keynote address, discussing the future of microprocessor design and why embedded chips are often overlooked in the press. Other attractions include more than 150 booths and 30 new classes covering new microprocessors, development tools, simulators, emulators, and everything an embedded designer could want or need.

Admission to the conference and the tutorials goes for $1,095 before 4/8; conference-only admission is $795. To register, call Miller Freeman (San Francisco) at 415.905.2152; fax 415.905.2220.

PLDs and EDA Come to SC, CA
Two concurrent events will fill the Santa Clara (Calif.) Convention Center on April 25–27: **PLDCon '95** and **WinEDA '95**. It promises to be one powerful venue for system and board designers. Learn the latest programmable logic design techniques and see what's new in Windows-based tools and applications for engineers.

Admission for all three days costs $275, or $225 for two days. To register, call ARI (Carrollton, Tex.) at 800.839.2429; fax 214.245.8700.

If It's Spring, It Must Be Comdex
Like death and taxes, you knew **Comdex/Spring** was inevitable. This year, the world's largest information technology show burns up Atlanta on April 24–27. Promising to fill the aisles with everything from the latest in multimedia and business telephony to network-centric applications and groupware, Comdex is a show like no other. Sharing the Georgia World Congress Center during the same week will be **Windows World '95**, Microsoft's official conference and exposition for its OS products and a multitude of Windows application programs.

Admission to the exhibits runs only $75. One-, two-, and four-day conference passes cost $325, $455, and $550. To register, call The Interface Group (Needham, Mass.) at 617.449.6600; fax 617.449.2674.
