

OPTO 22 SNAP Component List

SNAP I/O™ System

Opto 22's SNAP I/O system is a versatile combination of hardware and software products for applications in industrial automation, remote monitoring, and enterprise data acquisition.

The system consists of the following components:

- Control, human-machine interface (HMI), and OPC (OLE for process control) software
- Industrial controllers
- I/O processors ("brains")
- Digital, analog, and special-purpose I/O modules
- Mounting racks, power supplies, and accessories

This document lists SNAP part numbers by component category and refers you to product data sheets for specifications and additional details.

If you need help selecting SNAP components, see the *SNAP Selection Guide* (Opto 22 form 1377).

For examples of SNAP systems used in industrial automation, remote monitoring, and data acquisition applications, see the *SNAP Applications Guide* (form 1368). Both guides are available from our Web site, www.opto22.com.
